Company

Mona Engineering & Trading Company is a leading comprehensive Mechanical, Electrical, and Plumbing (MEP) provider of services ranging from designing and sourcing to installation and maintenance. We offer a holistic MEP approach that meets the highest expectations and industry standards.

Since 2012, we have been the go-to MEP partner for renowned clients across various sectors and we take pride in our extensive industry knowledge, technical expertise, and constant commitment to delivering cutting-edge MEP products and services that ensure the efficient functioning of MEP systems, contributing to the overall success of our clients' projects.

We invite you to explore our journey to excellence highlighting our core values, expertise, and services that have made us the trusted MEP company we are today. We look forward to catering to your needs with the same commitment and passion that have defined us since our early days.

Mission

To be the top-most globally recognized provider of bespoke avant-garde MEP solutions, with a clear business strategy underpinned by integrity, innovation, and dedication aimed for our clients' success.

Vision

To create a world where MEP systems are seamlessly integrated, energy-efficient, and environmentally conscious, while setting new standards for the industry. We aim to make a lasting impact in the MEP world, enrich the lives of our clients, and play our part in preserving our planet for future generations.

Values

We are committed to:

Excellence: we deliver top-notch MEP solutions designed not only to meet but to exceed industry standards, while ensuring the safety, functionality, and longevity of our clients' projects.

Innovation: we continuously research and adopt cutting-edge technologies and sustainable practices to develop and implement MEP systems that are both efficient and environmentally responsible.

Client Satisfaction: we build lasting relationships with our clients by understanding their unique needs and consistently aiming to exceed their expectations in terms of quality, cost-effectiveness, and timely delivery.

Sustainability: we promote environmental responsibility by designing and implementing MEP systems that minimize resource consumption, reduce carbon footprint, and support a greener, more sustainable future.

Human Resource Development: we empower our team members to provide innovative solutions and unparalleled services by nurturing their skills, expertise, and creativity to ensure they remain at the forefront of the industry.

Community Engagement: we contribute to the well-being of the communities in which we operate through philanthropic efforts and support of educational initiatives within the engineering sector.

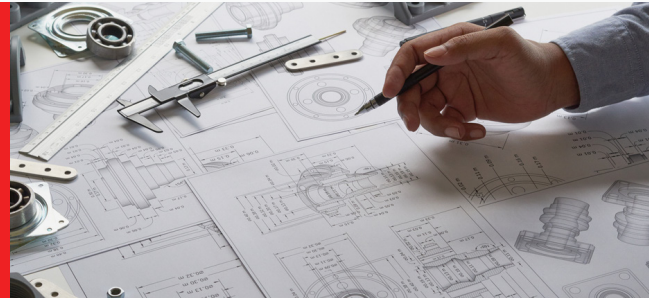

Services

Every project is a canvas that we paint with precision to ensure it aligns perfectly with our clients' requirements.

Your success is ours, and we are here to take you to new heights in the world of MEP solutions.

Design and Engineering:

Our journey begins with thoughtful design and meticulous engineering. Our team of experts collaborates to craft MEP solutions that are efficient and compliant to standards and regulations.

Supply of MEP Equipment:

By virtue of our extensive network, we source and provide top-quality MEP equipment and components. From firefighting systems that keep spaces safe to ventilation and air distribution systems, we provide reliable equipment with unmatched excellence in every detail.

Installation and Commissioning:

Installation is the heartbeat of any MEP system. Our skilled engineers and technicians ensure that every piece falls seamlessly into place. We go a step further with commissioning by making sure that everything is calibrated to perfection and ready to function at its peak.

Maintenance and Repairs:

Our commitment goes beyond installation. We stay by your side, offering continuous maintenance and swift repairs to keep your MEP systems not just operational, but in pristine condition, extending their lifespan and performance.

Energy Efficiency Solutions:

In a world that increasingly values sustainability, our energy-efficient solutions make a significant impact. From HVAC systems to lighting solutions that reduce energy consumption, we help you curb your environmental footprint while saving on operational costs.

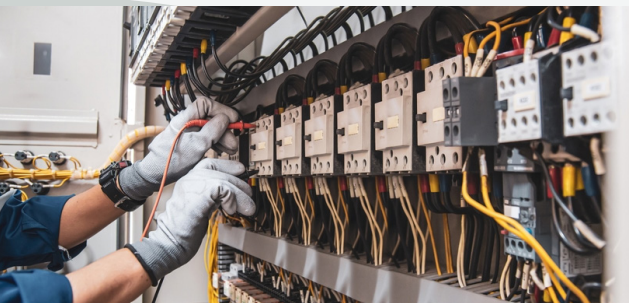

Air Quality & Ventilation Systems:

We understand that clean air and a comfortable indoor environment are essential. Our expertise extends to designing, installing, and maintaining ventilation and air quality systems to ensure that your spaces are healthy and pleasant.

Plumbing and Sanitary Systems:

From residential to industrial applications, we offer comprehensive plumbing and sanitary system solutions. Our systems are not just about functionality but also about durability and reliability.

Electrical Services:

With expertise in electrical systems, we offer electrical panel installation, intricate wiring, lighting solutions, and efficient power distribution that power your spaces seam-

Fire Protection Systems:

Safety is non-negotiable. We specialize in designing and installing fire protection systems encompassing fire alarms, sprinklers, and suppression systems. With our solutions, you're not just compliant; you're secure.

Safety Systems:

Hazardous materials require extra care. We provide safety solutions, from gas detection to emergency lighting and safety cabinets, to ensure that your materials are stored and handled safely.

Partners & Products

Ventilation Systems

NOVENCO

Founded in 1947 with a vision to revolutionize the industry, Novenco has continuously redefined what is possible in the field of air handling, ventilation, and fire safety. Through the years, the company has honed its expertise in creating high-performance solutions that enhance indoor air quality, ensure safety, and improve the overall quality of life.

At the heart of Novenco's success lies a comprehensive set of core competencies:

1. Air Handling and Ventilation:

Novenco's expertise in air handling and ventilation is unrivaled, and the company's commitment to creating healthy and comfortable indoor environments is the driving force behind its innovative ventilation solutions.

2. Fire Safety Systems:

With state-of-the-art fire safety systems, including fire dampers and smoke extraction solutions, Novenco ensures the well-being of people and the protection of valuable assets in the event of a fire.

3. Customized Solutions:

Novenco works closely with clients to tailor products best-fitting the specific needs of each project, ensuring that the end result aligns perfectly with the client's requirements and localized solutions.

Building & Industry

NOVENCO

SCHAKO Group

EMAK

Since its establishment in 1968, EMAK Co. performs activities ranging from prestigious international & domestic turnkey contracts to industrial productions. EMAK plays a vital logistic role in the industries of Food, Construction, Chemical, Textile, Ship Building and Tourism, and wholesale marketing, besides well-known references in refrigeration, ventilation, and air conditioning industries.

With more than 50 years of experience, EMAK Co. has never ceased to follow the newest and highest trends and technologies through joint ventures, representations, and agencies along with some of the leading companies such as Polimex-Cekop (Poland), STAL Refrigeration AB (Sweden), GRAM A/S (Denmark), ABB Refrigeration AB (Sweden), BBC-YORK (Germany), LINDE AG (Germany).

EMAK Co. holds the highest international certification of quality BS EN ISO 9001:2015 from the British Standard Institute (BSI) and always strives to remain a trustworthy partner to its customers.

Partners & Products

Gas Detection Systems

KIMESSA

Kimessa specializes in fixed gas measuring and control systems and holds the ISO 9001:2008 certificate. It offers the most effective safety solutions to protect the population and the environment from gases that have an adverse effect on the human health or represent a major risk due to their toxic or explosive/flammable properties. All Kimessa products have been developed and manufactured in Switzerland and produced according to the highest quality requirements of guideline 94/9/EG(ATEX).

KIMESSA ensures a dedicated professional service worldwide through trained partner companies and is committed to developing, manufacturing and marketing qualitatively and technically superior and extremely maintenance-friendly gas monitoring systems. With the latest generation of devices, it has achieved a leading position worldwide in the field of technical solutions.

INOSENT

Thanks to its great experience, unique product lines, and continuous development, Inosent provides the latest bespoke technological possibilities in gas detectors and gas detection systems.

INOSENT offers optimal product combinations for state-of-the-art gas detectors and provides a product line meeting all your expectations in an ideal manner, thus concluding your search for a suitable gas detector once and for all.

Partners & Products

Flame Detectors

SENSE-WARE

Founded in 2001, SENSE-WARE is a manufacturer and international operating trading company selling high quality safety products. Headquartered in Veenendaal, the Netherlands, SENSE-WARE supplies a comprehensive delivery program of products which are applied in heavy applications in the chemical and oil and gas industry.

SENSE-WARE
THE FLAME DETECTOR
COMPANY

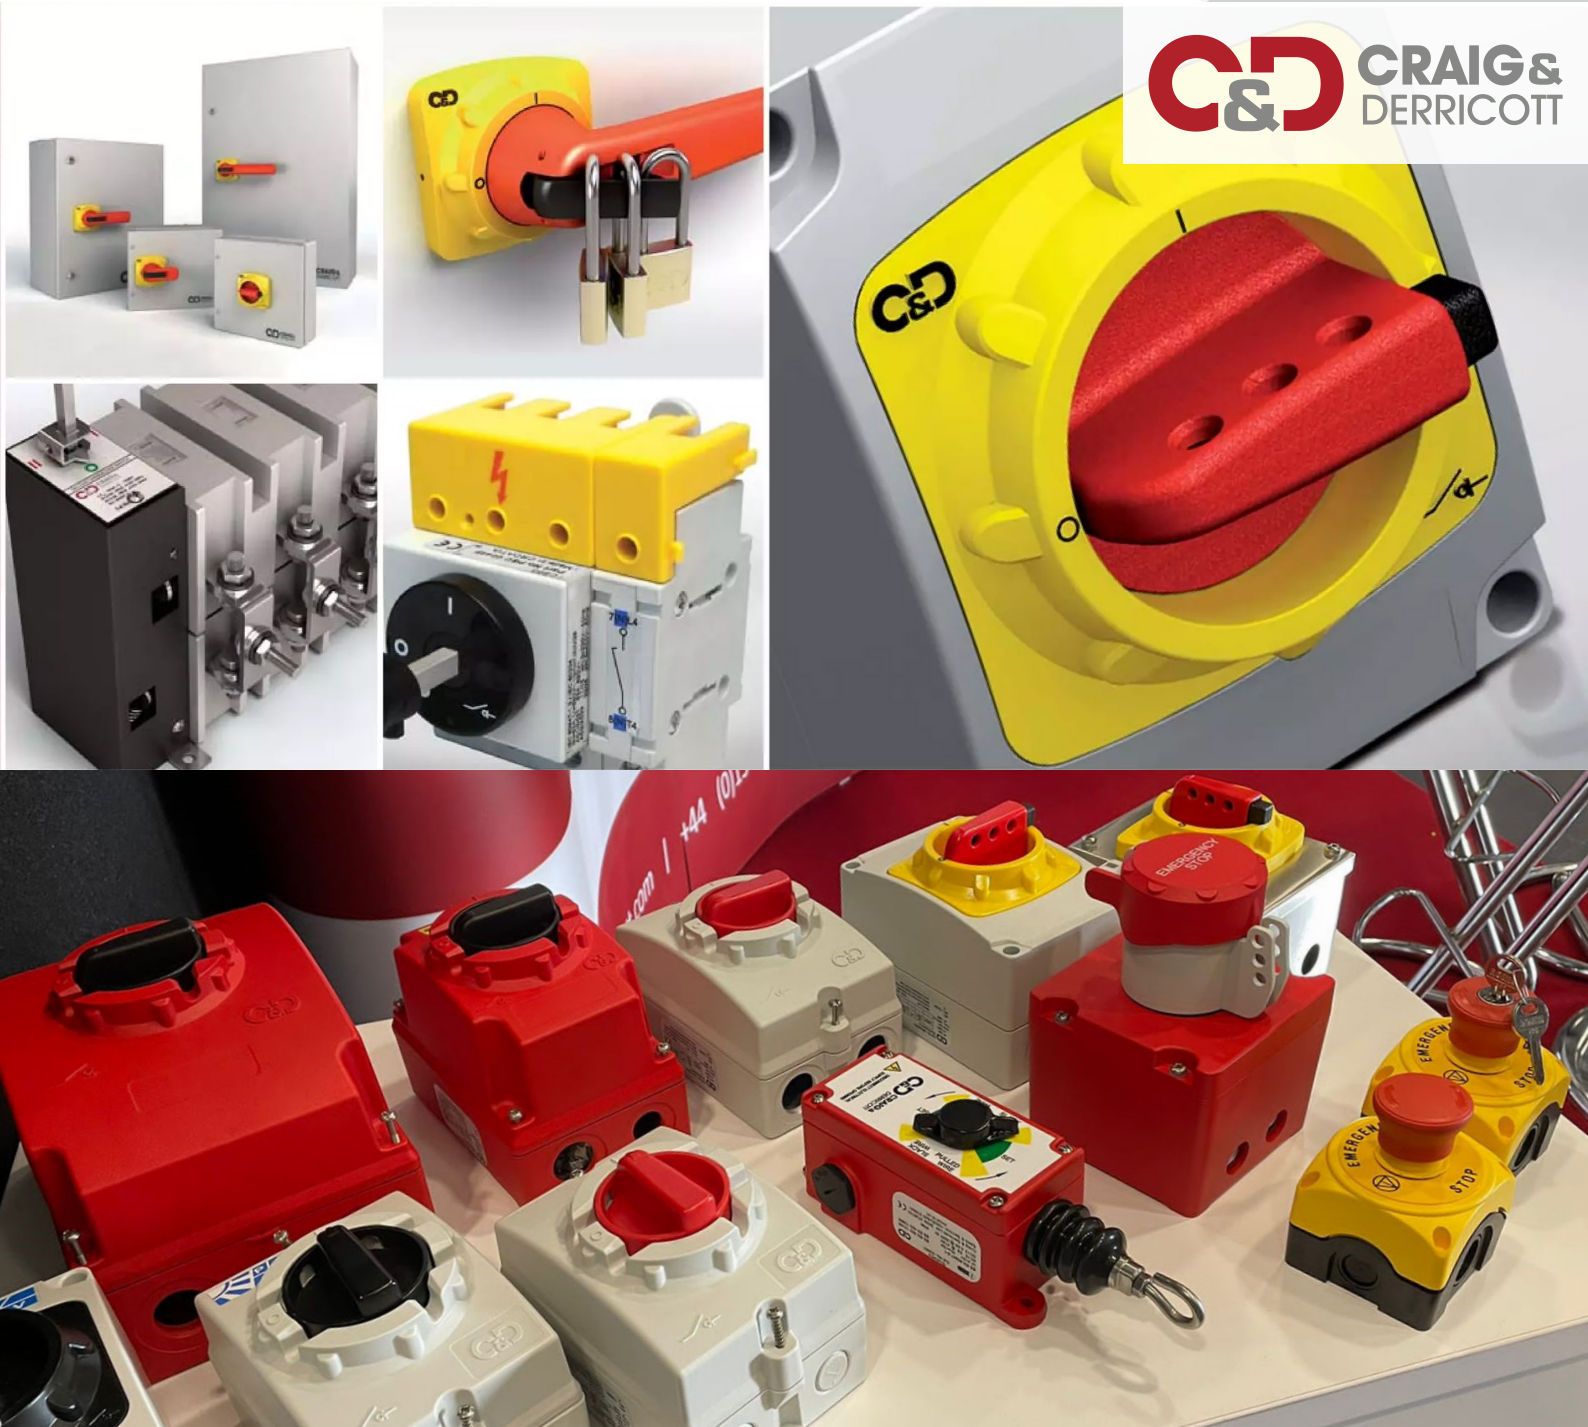

SENSE-WARE is an independent player in the market for industrial flame detection since 2010. It introduced the 210 series flame detectors in 2012 with the UV Flame detector and UV/IR Flame detector. SENSE-WARE also manufactures the T-229/4P universal UV/IR Flame detector Test Lamp which is widely used in marine application for testing UV, single IR and UV/IR flame detectors of many brands. SENSE-WARE grants a 5 years warranty on flame detectors and its Quality Management System (QMS) is ISO 9001 certified.

Disconnect Switches / Isolators

CRAIG & DERRICOTT

Since 1922, Craig & Derricott specializes in the design, manufacture, and overhaul of low voltage electrical control and switchgear, EV chargers, rail rolling stock components, and LED lighting supplying to customers large and small around the world. Over the past 100 years, British manufacturing company Craig & Derricott has forged a strong reputation for customer service excellence and delivery of high-quality handmade products.

DERRICOTT

Partners & Products

Kitchenhoods / Ecology Units

AVANTE

With over 30 years of experience in kitchen and HVAC systems in the United Kingdom, India, and Gulf countries, Avante offers a comprehensive range of kitchen ventilation systems from canopies to Ecology units and fresh air handling units.

AVANTE's manufacturing facility is located at Dubai investment Park, one of Dubai's most prestigious industrial manufacturing hubs. Avante uses the latest equipment and computer-aided manufacturing processes and offers onsite testing facility to test canopies before they are dispatched to the customer.

Air distribution Systems

AIRWELLCARE

Airwellcare HVAC Systems LLC is an ISO 9001 : 2015 accredited organization and a fast growing Central Air Distribution products (HVAC) manufacturing company, offering a wide variety of products such as Dampers, Sound Attenuators, Acoustic Barriers, Acoustic Louvers, Variable Air Volumes and Air outlets for HVAC Systems.

AIRWELLCARE is engaged in design, development, manufacture and sales of central air distribution products for HVAC duct & ductless systems in construction, industrial, commercial, offshore and onshore applications. The company keeps an open mind to the requirements, ideas, and concepts of clients and end users to offer a final seamless tailor-made solution.

Certificates

At **Mona Engineering and Trading Company**, we take immense pride in our unwavering dedication to delivering the highest standards of quality, safety, and sustainability. Our commitment to these core principles is reflected in the diverse range of certifications we hold, each symbolizing our relentless pursuit of excellence in our areas of expertise.

Quality Management Certification: ISO 9001:2015

Our ISO 9001 certification is a testament to our commitment to quality. It signifies that every product and service we provide undergoes rigorous scrutiny to ensure it meets or exceeds industry standards.

Environmental Responsibility: ISO 14001:2015

Our ISO 14001 certification embodies our dedication to eco-conscious solutions and exemplifies our commitment to always adopt sustainable practices and reduce our environmental footprint. We believe that we must not only meet the needs of the present but also ensure a sustainable future.

Health and Safety First: ISO 45001:2018

Our ISO 45001 certification showcases how we prioritize the well-being of our team members and clients through our commitment to maintaining a safe and healthy workplace. Safety isn't just a priority; it's an integral part of our culture.

Facility Management Systems: ISO 41001:2018

Our ISO41000:2018 Certificate confirms our commitment to ensuring that the proper functioning of our products goes to the extent of making sure they are also well maintained as per international standards and regulations.

Qatar Civil Defense Certificates

In addition to company-wide certifications, many of our products hold their own QCDD certifications. These certifications guarantee that our products comply to the local industry and safety standards, reflecting our commitment to providing our clients with reliable and high-quality equipment.

Industry Certificates

Our commitment to regulatory compliance in various industries is demonstrated by a range of certifications that illustrate our dedication to adhering to specific requirements in different markets.

These certifications are more than just pieces of paper; they represent our pledge to deliver the best, safest, and most sustainable solutions in the MEP industry. They are a reflection of our values, guiding our decisions and actions as we strive to exceed our clients' expectations while contributing to a better, more sustainable future.
